

CLAIMS

Claim 1

1. A warmed display fixture comprising:

A plurality of products to be displayed;

A housing comprising a low front wall, a higher back wall, a bottom wall, a top wall, and end walls forming a display compartment, said housing having an access opening providing access to said display compartment from outside said housing;

A three step panel within said display compartment dividing said display compartment into an upper air well above said three step panel and lower air well below said three step panel;

An air passageway having an inlet opening above said three step panel, an outlet opening below said three step panel and passageway walls enclosing said passageway between said inlet opening and said outlet opening;

A three step panel comprising three horizontal steps and two riser steps clad with ceramic tile;

A three step panel comprising three heaters attached to the bottom of said three horizontal steps;

A coil heater;

A set of fans positioned to move air over said coil heater located in said inlet opening, under said three step panel and out of said outlet opening.

2. A warmed display fixture according to claim 1 wherein said coil heater is positioned in said outlet opening.
